

CYBER SAFE

PREPARE. ASSESS. IMPLEMENT. RESPOND.

THERE HAS BEEN A SECURITY BREACH. NOW WHAT?

Imagine a hacker sending emails to vendors on your behalf, directing payment to a foreign account. Or an unauthorized party obtaining a customer's credit card information. Or an unknown hacker blocking access to your business computers and demanding ransom for the decryption key.

Join us for a CyberSafe discussion on legal, technical and law enforcement responses to common cybersecurity incidents, including strategies to minimize and mitigate the damage of a cybersecurity incident. And hear from a local business leader who navigated his company through a cyberattack.

Delcie Bean, Paragus Strategic I.T.

Julie Cowley, FBI

Eric Hagopian, President, Pilot Precision Products

Jim Duda and Lauren Ostberg, Bulkley Richardson's Cybersecurity Group
