

# CYBER SAFE

PREPARE. ASSESS. IMPLEMENT. RESPOND.

## IS YOUR WISP (OR LACK THEREOF) PUTTING YOUR BUSINESS AT RISK?

The term WISP may sound frail and fleeting but, in fact, a Written Information Security Program, or “WISP,” is critically important to your company’s security and should be an essential component of business operations. This installment of Bulkley Richardson’s CyberSafe series will cover:

- Understanding why a WISP is essential to your business
- Assuming risks – including data theft, legal action and fines – by not having or following a WISP
- Preparing a WISP that covers all the bases
- Taking actions today to safeguard personal information and protect your company

---

Join Lauren C. Ostberg from Bulkley Richardson’s Cybersecurity Team for this virtual seminar.
