

# Are You Vulnerable to a Phishing Scam?

Most cyberattacks—from a small, local breach to the major ransomware attack on the Colonial Pipeline—start with phishing scam. It can take just one email to “hook” a recipient into providing access to valuable information.

CHRIS WISNESKI

LAUREN OSTBERG

Join Chris Wisneski, IT Security and Assurance Services Manager at Whittlesey, and Lauren C. Ostberg, attorney in Bulkley Richardson’s cybersecurity group for a virtual seminar.

## Topics discussed:

- Phishing and the role it plays in breaches
- Methods of filtering out and recognizing phishing attempts
- The importance of phishing-related training
- And more

 **Date:** Thursday, July 15 at Noon
